# WHO WE ARE

---

We are the leading manufacturer of bedrock bath beds dedicated to promoting health and relaxation from Kagoshima, Japan.

At the heart of our esteemed organization lies a profound commitment to enhancing the well-being of our customers through the production of superior bedrock and lava stone bath beds, crafted from only the highest quality materials sourced in Japan and around the world.

Our company takes immense pride in this endeavor, recognizing the pivotal role we play in improving the overall quality of life of our clientele. Our mission is not just to sell a product but to provide a comprehensive solution for relaxation and well-being. Our unwavering dedication to promoting comfort and tranquility for our valued customers is the driving force behind our efforts.

Each bedrock and lava stone bath bed is a testament to our commitment, embodying luxury, durability, and the promise of ultimate relaxation. In the pursuit of excellence, we consistently strive to exceed expectations, ensuring that every interaction with our company and products enriches our customers' lifestyle.

# VISION

To extend individuals' healthy lifespans and nurture heartfelt smiles by embracing diversity and empathy worldwide, fostering mutual understanding, and expanding the circle of peace.

# MISSION

To become a global bridge as a specialized manufacturer and trading company in health and relaxation.

# WHAT IS LAVA STONE & BEDROCK BATH?

## UNVEIL THE SERENITY OF THE TRADITIONAL JAPANESE BEDROCK / LAVA STONE BATH

Traditional Japanese bedrock and lava stone bath, also known as "Ganban-yoku," involves lying on heated bedrock / lava stone. It is renowned for its ability to detoxify the body, improve circulation, reduce muscle tension, and induce relaxation. This therapy has gained widespread popularity in Japan and worldwide, particularly among those seeking relaxation and overall well-being.

Our signature lava stone bath bed is sourced from active volcanoes in Japan, including Mount Fuji and Sakurajima, renowned for their exceptional heat retention properties and mineral-rich content. These attributes further enhance the health and wellness benefits of the bath, providing a serene experience rooted in Japan's geological heritage.

OUR CAREFULLY SELECTED BEDROCK AND LAVA STONES PLAY  
A SIGNIFICANT ROLE IN ENHANCING  
THE THERAPEUTIC EFFECTS OF THE EXPERIENCE.

General well-being

## FIR THERAPY ● ● ●

The natural stones, particularly lava stone from Mount Fuji and Sakurajima, possess inherent properties that enable them to emit far-infrared radiation (FIR) when heated. FIR is a type of electromagnetic radiation that has wavelengths longer than visible light, and it is known for its ability to penetrate deeply into the body, promoting various health benefits such as improved circulation, detoxification, and pain relief. The FIR emitted by these heated stones helps to warm the body from within, inducing relaxation, soothing muscle tension, and fostering a sense of well-being.

## NEGATIVE ION ● ● ●

Our selected bedrock and lava stone offer rich minerals, sourced from volcanic regions. When heated, these stones emit negative ions, which are known to promote relaxation and reduce stress. This, combined with the therapeutic effects of far infrared radiation, creates a tranquil and rejuvenating experience, enhancing overall well-being.

# LAVA STONE BATH BED

Experience true luxury with our lava stone beds, hand-selected from the majestic landscapes of Mount Fuji and Sakurajima. These are not just stones, but treasures imbued with the power and majesty of these iconic mountains.

## MT FUJI LAVA STONE BATH BED

Experience the majestic beauty of Mount Fuji while effectively warming your body from within.

Mount Fuji, located in Shizuoka and Yamanashi Prefectures, is an active volcano. The lava from Mount Fuji contains high levels of silica and iron, which have various beneficial effects. These include improving perspiration, promoting relaxation, and boosting metabolism.

No radiation is emitted, making it recommendable for those concerned about radiation exposure.

## SAKURAJIMA LAVA STONE BATH BED

Sakurajima is a peninsula in Kagoshima Prefecture, and an active volcano that continues to erupt. The lava from Sakurajima contains high levels of silica, iron, and calcium.

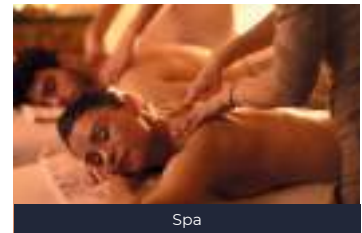

Due to its far-infrared radiation effects, it warms up effectively. Being andesite, it has fine pores that provide excellent moisturizing properties. When heated, the mineral content vaporizes along with moisture, allowing a gradual and beneficial perspiration.

No radiation is emitted, making it recommendable for those concerned about radiation exposure.

Height - 200cm  
Length - 7cm  
Width - 76cm  
Weight - 70kg  
Load Capacity of the Bed - 180kg
